New & Extended IRC Projects

- IRC’s collaboration with EEL and private pine rockland landowners has proved to be of great importance to the restoration of pine rockland habitats. Our work thus far on these areas has just been approved for additional funding in the amount of $95,000 on the Pine Rockland Restoration project in Miami-Dade and Monroe county from U.S. Fish and Wildlife Service.

- IRC has just signed a contract with NatureServe to receive funding to develop a list of trees native to Puerto Rico and the U.S. Virgin Islands which will be added to the Plantas de la Isla de Puerto Plants / Plants of the Islands of Puerto Rico website and other resources. IRC’s Senior Botanist, Carlos Trejo-Torres will be spearheading this project.

- IRC will be starting a new campaign with the goal to raise $25,000 to launch The Floristic Inventory of the Bahamas Archipelagos website. Raymond Jungles, Inc. has donated support towards the final development and launch of this floristic inventory.
