

Restoring the Link Between People & Nature

The Institute for Regional Conservation

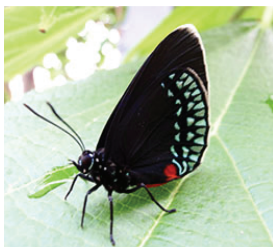

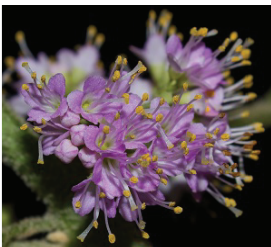

Dedicated to the protection, restoration, and long-term management of biodiversity on a regional basis and to the prevention of local extinctions.

IRC has developed a number of programs designed to prevent regional extinctions of rare plants, animals, and ecosystems and to improve conservation and restoration on a regional basis. Central to this work is a belief that people can work with nature to restore ecosystems and create a strong sense of place.

IRC's Main Program Areas

- **Research**
- **Restoration**
- **Conservation**
- **Education & Outreach**
- **Policy**

The Institute for Regional Conservation

*Florida's future depends on you...
...get involved in conservation today!*

IRC provides you with the opportunities and tools to make a meaningful difference.

- **Become a Volunteer!** We hold a wide variety of restoration days year-round from Monroe County through Palm Beach County and rely on volunteers of all ages and skill levels. Frequent opportunities include native plantings, beach clean-ups, pine rockland restoration, and data entry at the office.
- **Attend a Workshop!** Follow us on social media to learn about our free workshops that cover topics from rare plant and butterfly conservation to native landscaping.
- **Use our FREE Online Resources!** Learn how to transform your yard into a thriving native habitat with Natives for Your Neighborhood or research the flora of Florida with our Floristic databases.

**IRC is a 501(c)3 Non-profit,
and we depend on you for support!
Your donations go directly to sustaining
IRC's conservation efforts in our community.**

**Learn more about our programs and how
to contribute by visiting our website:
